

Ref. No 20200324/001Date 24-03-2020**Random Number Generator Certificate**

This certificate is presented to establish that SVAP Infotech has thoroughly evaluated the Random Number Generator by MyTeamRummy, and has found that it complies to the relevant standard terms.

Software Provider: - MyTeam11 Fantasy Sports Private Limited

Software Provider URL: - <https://www.myteamrummy.com/>

Operator: - MyTeam11 Fantasy Sports Private Limited

Operator URL: - <https://www.myteamrummy.com/>

The term RNG refers to an algorithm used for generating random numbers for a product, website or service. In order to ensure that the product/service or website complies with statistical randomness developers use RNG.

Evaluation Methodology Used: -

The primary evaluation method used by SVAP Infotech included shuffling different card combination and recording the results configured on the basis of repetition, predictability and distribution frequency.

As a part of the evaluation, 5 different decks of cards were tested. A single deck card without a joker was shuffled first as a part of the evaluation. Then, 2 decks without a joker and then with 1 joker per deck were used, followed by the shuffling of 3 decks in a similar manner.

Results: -

The shuffling tests were carried out in an order to ensure that the number generated by the RNG meet the statistical randomness standards when the cards are dealt from shuffled decks.

As a result of the experiment or evaluation, it has been found that the cards dealt from the shuffled decks are unpredictable, non-repeatable and uniformly distributed.

Disclaimer: -

The evaluation was carried out on a validity large-scale, testing all the possible scenarios to ensure that an appropriate level of testing was carried out.
